

## “Your Premier Supplier For Sheet Extrusion”

**GEM Board™** is the sheet of choice for your all your indoor furniture, outdoor furniture and cabinetry applications. This high-grade HDPE sheet ranges from .200” to 1.5” thick while meeting ASTM Standards.

GEM Plastics can fulfill your color needs through our ability to color match and our selection of over **100 colorants** in stock. Our full array of optional additives like UV protection, Anti-Microbial, and Anti-Oxidants protect your projects from the many environments your project may endure. GEM Plastics is an industry leader in making lightweight, sturdy, foamed sheet for a variety of applications.

GEM’s focus is on improving the ease of doing business. That is why we stock over 2 million lbs of sheet in our new warehouse, operate our own trucks, and are home to the friendliest customer service in the industry.
